

# Riedell® Sizing Guide for Roller Low-Cut Boots

We recommend having an authorized Riedell skate fitter assist you in proper sizing of your skates (visit [roller.riedellskates.com](http://roller.riedellskates.com) to find a dealer nearest you). If that option is not readily available, print out this document and follow the step by step instructions as a guide to help you find your Riedell size.

## Tips

### MEASURE DURING MID-DAY

Feet can be different sizes at various times during the day.

### HAVE A FRIEND HELP

You will get more accurate measurements with help.

### WEAR NORMAL SKATE SOCKS

Wear socks you typically skate in - or none if you skate barefoot.

### STAND UP WHEN MEASURING LENGTH

Stand straight with equal weight on both feet and do not lean on or away from foot being measured.

### SIT DOWN WHEN MEASURING WIDTH

Sit straight with equal weight on both feet and do not lean on or away from the foot being measured.

**D** Fold at dotted line

## Foot Measurements **E**

	Right	Left
Length	<input type="text"/>	<input type="text"/>
Width	<input type="text"/>	<input type="text"/>
Width Letter	<input type="text"/>	<input type="text"/>

### IMPORTANT PRINTING NOTE:

Be sure your printer scale settings are at 100% or Actual Size.

**A**

**B**

**C**

**A****B**

## Step 1

Cut or fold at dotted lines **A** and align pages so that **B** and **C** form a circle and are the size of a quarter and tape pages together. Please make sure to check the scaling of the Guide by placing a ruler (in inches) next to the one on the bottom of this sheet **F**.

*\*If scaling is off, be sure printer settings are at 100% or actual size.*

## Step 2

Fold at dotted line **D** and place sizer against a closed door.

## Step 3

Place heel on the sizing guide with your back firmly against the door. Have a friend measure the length of your foot to the longest toe and record your inch and size number measurement in table **E**.

Repeat for other foot.

**F** Cut below dotted line, if tape measure is needed for width measurement

**C**

## Step 4

Sit in a chair with both feet on the floor, and have a friend measure your foot width at the ball of your foot. Use a tape measurer or the paper tape measure provided at the bottom of this sheet **F**. Measure the ball width of your foot at its widest part as shown. Record your width measurement in table **E**.

Repeat for other foot.

## Step 5

Use the longest size for Right or Left foot and take your widest foot measurement. Using the measurements taken for each foot, find your width by referencing the Width Charts found on page 3 and 4 of this PDF.

**Note:** Your Riedell skate size is the longest of your 2 length measurements and the wider of your 2 width measurements of your feet.
